

FundHub \$297 — Locked Ads

2026-09-19 · @Someone

Eight ads approved verbatim: five straight offer, two Haynes DR, one abandoned cart retargeting. Plus seven shorts, the bullet VSL, and briefs for Paul's six statics and four deliverable walkthroughs. Every ad carries the soft pull line. Each is built around one reason to buy with its own body, so they read as separate creatives rather than one ad with seven hooks.

Ads 4 and 5 were rewritten today around their own reasons after the audit found them duplicating ads 1 and 7.

Ad 1 — Straight offer, full read

Straight offer. 270 words, about 1:48. Shoot: black tee, plain wall or desk, static tripod, one continuous take.

For \$297 I'll tell you how much funding you qualify for right now, and how much you qualify for once your file is optimized.

Here's what comes with it.

Your credit pulled from all three bureaus. Where your score sits today and where it can sit once your file is cleaned up.

Everything on your file holding you back, we show you all of it. Sometimes it's one item. Sometimes it's twelve. Every one of them comes with the document you need to address it, so you can maximize your fundability.

We tell you what order to do it in.

And we give you a list of the banks that will approve you once your file is fully optimized.

Call a funding company and they'll promise you a roadmap. You get on the call and you get pitched, because the intention was always to sell you. Buy a course instead and you're paying five to ten thousand dollars to go dig the answers out yourself.

I've been doing this for ten years. I've seen hundreds of files. I have tens of thousands of data points across the funding ecosystem and I reverse engineered all of it, so you get it for a fraction of the price with none of the runaround.

If you're not happy with what you get, email us and we'll refund you.

Click below, pay the \$297, fill out the form. Takes about ten seconds. Then you're holding the roadmap that takes a file that only qualifies for fifty thousand and turns it into a file worth several hundred thousand.

We pull your credit with a soft inquiry, so your score doesn't move.

Ad 2 — Straight offer, declined and nobody told you why

Straight offer. 259 words, about 1:44. Shoot: grey henley, kitchen counter or home desk, static tripod.

You got declined and nobody told you why. For \$297 I'll tell you exactly why, and what it takes to get a yes.

Your credit pulled from all three bureaus. Where your score sits today and where it can sit once your file is cleaned up. On a lot of files that spread is a couple hundred thousand dollars in funding you're missing out on.

Every single thing on your file that got you turned down. The cards sitting too high, with the exact balance to bring each one down to. The harmful items, each one with the document you need to address it, already written with your accounts in it.

The order to do all of it in, month by month.

And a list of the banks that will approve you once your file is fully optimized.

Most guys go get declined again instead. Same file, different bank, and every one of those applications sits on your report making the next one harder.

I've been doing this for ten years. I've seen hundreds of files. Tens of thousands of data points across the funding ecosystem, reverse engineered so you get the answer in ten seconds instead of six months.

If you're not happy with what you get, email us and we'll refund you.

Click below, pay the \$297, fill out the form. Takes about ten seconds. Then you know exactly what stands between you and the funding you went after in the first place.

We pull your credit with a soft inquiry, so your score doesn't move.

Ad 3 — Straight offer, what your file is actually worth

Straight offer. 261 words, about 1:44. Shoot: dark quarter zip, outdoor, red rock behind, static tripod.

You have no idea what your credit file is actually worth. Optimized correctly, your file could be worth two hundred, three hundred, four hundred thousand dollars in funding, and you just don't know how to get there in the shortest amount of time.

For \$297 I'll tell you what yours carries.

Your credit pulled from all three bureaus. Where your score sits today, and where it can sit once your file is cleaned up.

Then the two amounts. What you qualify for right now, and what you qualify for once your file is optimized. That difference is the money that starts your new business, funds the one you're already running, or gets you ahead of the guys you're competing with.

Everything standing in your way gets named. Sometimes it's one item. Sometimes it's twelve. Every one of them comes with the document you need to address it, already written with your accounts in it.

The order to do it in, month by month.

And the list of banks that will approve you once your file is there.

I've been doing this for ten years. I've seen hundreds of files. I have tens of thousands of data points across the funding ecosystem and I reverse engineered all of it.

If you're not happy with what you get, email us and we'll refund you.

Click below, pay the \$297, fill out the form. Takes about ten seconds. Then you know what your file is actually worth.

We pull your credit with a soft inquiry, so your score doesn't move.

Ad 4 — Straight offer, one card holding the file down

Straight offer. 244 words, about 1:38. Shoot: black tee, parked truck or plain interior, handheld, close framing.

One credit card can hold your entire file down. You've got a card reporting at seventy, eighty, ninety percent of its limit, and every lender that looks at you sees that before they see anything else.

For \$297 I'll pull your credit from all three bureaus and show you exactly which card it is, the exact balance to pay it down to, and what your file qualifies for once it's there.

That's usually the fastest move on any file. One paydown, and a lender reads you completely differently thirty days later. Most people never find out which card, so they pay down the wrong one, or a little on all of them, and nothing moves.

Then I'll name everything else standing in the way. Sometimes it's one item, sometimes it's twelve. You get the document for each one already written, with your accounts in it.

I'll give you the order to do it in, month by month.

And I'll hand you the list of banks that will approve you once your file is there.

I've been doing this for ten years and I've seen hundreds of files. The card is almost always the first thing I look at.

If you're not happy with what you get, email us and we'll refund you.

Click below, pay the \$297, fill out the form. Takes about ten seconds and you'll know which card it is.

We pull your credit with a soft inquiry, so your score doesn't move.

Ad 5 — Straight offer, max fundability, both sides of the file

Straight offer. 271 words, about 1:48. Shoot: white tee or light button down, outdoor, midday, static tripod.

If you want the most funding your file can possibly get you, here's what almost everybody misses. Your file has two sides, personal and business, and most people stop after the first yes on one of them.

For \$297 I'll pull your credit from all three bureaus and show you both sides. What you qualify for right now, and what you qualify for once the file is fully optimized, personal and business together.

Sequenced right, the same file that gets you one approval carries several. That's the difference between walking away with fifty thousand and walking away with a few hundred thousand across your personal side and your business. Most people leave the second half sitting there because nobody told them it existed.

I'll name every single thing between you and the top end. Sometimes it's one item, sometimes it's twelve. You get the document for each one already written, with your accounts in it.

I'll give you the order to do it in, month by month, including when the business side comes in and what has to be locked on the personal side first.

And I'll hand you the list of banks that will approve you once your file is there.

I've been doing this for ten years and I've seen hundreds of files. I reverse engineered all of it so you get the whole thing instead of the first half.

If you're not happy with what you get, email us and we'll refund you.

Click below, pay the \$297, fill out the form. Takes about ten seconds.

We pull your credit with a soft inquiry, so your score doesn't move.

Ad 6 — Haynes, you already know, 10x your file

Haynes DR: hook, reasons, CTA with a so-you-can. 243 words, about 1:37. Shoot: black tee, outdoor, handheld, close framing. Distinct from the straight offer set, which is all static tripod.

Hook. You already know your credit file decides how much funding you can get. What you don't know is how much more that same file would carry if you optimized it first.

Reasons. For most people that gap is a couple hundred thousand dollars in extra capital. One card sitting too high. A couple of items nobody has addressed. Personal data that doesn't match across the three bureaus. Small fixes, and every one of them moves your fundability by more than you'd expect. That difference is what scales your company to multiple six figures a month, or funds the deal you've been waiting on, or gets the new thing off the ground.

Nobody sits down and tells you how to 10x your file, because this industry makes its money on you staying unprepared. Your application goes out, it gets shotgunned to a list of banks, and whatever it gets you is what you take.

I've been doing this for ten years and I've seen hundreds of files. I'll pull your credit and tell you what you qualify for right now and what you qualify for once your file is optimized. Then I'll hand you every document you need and the exact order to work them in.

CTA. Click below and grab it, so you can go after the full amount your file carries instead of settling for whatever it gets you today.

We pull your credit with a soft inquiry, so your score doesn't move.

Ad 7 — Haynes, the call that was never a roadmap

Haynes DR. 265 words, about 1:46. Shoot: grey henley, seated, indoor, handheld. Lower energy than ad 6, more conversational.

Hook. They told you to hop on a call and they'd walk you through your file. Remove your inquiries, show you the roadmap, tell you exactly what to fix. You got on the call and the whole thing turned into a pitch.

Reasons. The roadmap was never the product. It was the reason you picked up the phone.

And the roadmap is the single most valuable thing in this. The exact steps, in the exact order, to get from where your file is to where it could be. That's the difference between a little bit of funding and hundreds of thousands of dollars in personal funding plus hundreds of thousands in business funding, across multiple businesses. Stacked up, that's potentially seven figures. Every company in this space gatekeeps it for that exact reason.

You deserve to have it. If somebody's going to sell you something, fine. Getting told the call is a roadmap when it never was is a different thing.

So I took mine out of a call entirely. Ten years of doing this, hundreds of files. I'll pull your credit, tell you what you qualify for right now and what you qualify for once your file is optimized, name every single thing in the way, hand you the document for each one already written, and give you the exact order to set it all up.

Nobody calls you. Nobody pitches you.

CTA. Click below and grab it, so you know the whole plan before you ever talk to anybody.

We pull your credit with a soft inquiry, so your score doesn't move.

Bullet VSL — Haynes flow (LOCKED)

Nine beats off the Mastering VSLs SOP. About 430 words, 2:50. Read as bullets off the prompter. Sedona, direct to camera.

1. Hook, what I can help you with

- I'll tell you how much funding you qualify for right now, and how much you qualify for once your file is optimized. I'm Chris, I run FundHub.
- Optimized correctly, your file could be worth two hundred, three hundred, four hundred thousand dollars in funding. You just don't know how to get there in the shortest amount of time.

2. Credibility

- I've been doing this for ten years.
- I've seen hundreds of files.
- I have tens of thousands of data points across the funding ecosystem, and I reverse engineered all of it.

3. The opportunity

- The condition of your credit decides how much funding you get, on the personal side and the business side.
- Small fixes move your fundability more than you'd expect. One card sitting too high. A couple of items nobody has addressed. Personal data that doesn't match across the three bureaus.
- That difference is what starts your new business, funds the one you're already running, or gets you ahead of the guys you're competing with.
- Nobody in this industry sits down and shows you how to 10x your file, because they make their money on you staying unprepared.

4. The offer, price upfront

- \$297. One payment.
- I'll pull your credit from all three bureaus.
- I'll show you where your score sits today and where it can sit once your file is cleaned up.
- I'll tell you what you qualify for right now, and what you qualify for once your file is optimized, personal and business.
- I'll name everything holding you back. Sometimes it's one item. Sometimes it's twelve.
- Every one of them comes with the document you need to address it, already written, with your accounts in it. All six rounds.
- I'll give you the order to do it in, month by month.
- I'll hand you the list of banks that will approve you once your file is there.
- You fill out the form, takes about ten seconds, and all of it is in your account.

5. Objections

- Why \$297 when everybody else charges five to ten thousand. Because you're getting the roadmap. With them you're paying to go dig it out yourself.

- Do you do the work for me. No. You mail your own letters, so you hold every receipt and you see every response the day it lands.
- How long does it take. Some files take six months. Some take one. Some are closer than you think, and you'll know which one you are the day you open it.
- I know there are a lot of people in this space who will tell you whatever you want to hear to get you on a call. We're not going to do that. There's no call here.

6. Who it's for

- This is for you if you want the most funding your file can possibly get you, whether your credit is clean right now or it needs work.
- If you'd rather learn all of it yourself the long way, plenty of people do. It takes about six months and five figures.

7. Call to action

- Click below. Pay the \$297. Fill out the form. Takes about ten seconds.
- Then you're holding the roadmap that takes a file that only qualifies for fifty thousand and turns it into a file worth several hundred thousand.

8. Proof, on screen

- Ten years in the industry. Hundreds of files. Tens of thousands of data points.
- [TESTIMONIAL SCREENSHOTS] real ones only, names and photos, unpolished.

9. Close

- If you're not happy with what you get, email us and we'll refund you.
- All of this is aimed at one thing, which is your file optimized for the maximum amount of funding.
- Click below and grab it.
- We pull your credit with a soft inquiry, so your score doesn't move.

Shorts (LOCKED)

Seven raw shorts, 7 to 10 seconds each, one thought and a CTA. Cold prospecting and retargeting. Seated, face to camera, somewhere that looks expensive. Never selfie style. Captions on every one, since 85% of Meta video views are sound-off.

On-screen text on all seven: \$297 · Soft pull · Full refund if you're not happy.

1. If you want max funding and you're tired of dealing with people who don't know what they're talking about, click the link below.
2. Everybody in this industry gatekeeps this. I don't get it. I think everybody should get max funding. Click the link below.
3. Your file is probably worth two or three hundred thousand and you're getting fifty. Click the link below and find out.
4. You got declined and nobody told you why. I'll tell you exactly why and what it takes to get a yes. Click the link below.
5. They told you the call was a roadmap. It was a pitch. This is the roadmap, no call. Click the link below.
6. One card is holding your whole file down. I'll tell you which one and exactly what to pay it down to. Click the link below.
7. Ten years of doing this and I put all of it in a \$297 package so you don't have to learn any of it. Click the link below.

Why they run: cold prospecting performs at 6 to 15 seconds, hot retargeting at 10 to 20, and ads over 60 seconds are under 10% of long-running creatives. Raw delivery beats polished on cold CTR. The long ads carry the cold conversion work; the shorts warm the pixel cheap and close on retargeting.

Ad 8 — Abandoned cart (LOCKED)

Retargeting. For anyone who filled out the form and left before paying. Built on the four value drivers from \$100M Offers, asked as the four questions the buyer is silently asking: what do I get, what do I have to do, how long, what's the risk. Then the origin story as edification, then the testimonial. About 2:00. Seated, face to camera, same location as ad 1.

Run it on a 7 to 14 day window with a frequency cap. The audience rolls over on its own, so the creative doesn't need refreshing. Purchasers excluded. Requires the pixel or CAPI event firing on form submit and checkout view, or the audience doesn't exist.

You stopped at checkout. Fair. Most people in this industry are scammers and liars, and everything else you've tried to get funded has been a runaround. So \$297 probably looks like one more.

So let me put it in plain terms.

If I could show you that your file supports two or three hundred thousand more in funding than you're getting right now, and hand you the exact moves to get there, would you pay \$297 for that?

What do you have to do? Follow the steps in the order I give you and mail the letters I already wrote. That's the whole job.

How long? Ten seconds and all of it is in your account. The roadmap runs as long as your file needs, one month or six, and it tells you which on the first page.

What's the risk? If you're not happy with what you get, email us and we'll refund you. And we pull your credit with a soft inquiry, so your score doesn't move either way.

Here's why I can say that. My first funding round I got [\$27,000]. [An eight thousand dollar Chase card, eight in business credit, a five thousand dollar business card], because I had no idea what I was doing. It took me thousands of hours to learn what separates somebody who thinks they're fundable from somebody who's extremely fundable, two hundred, four hundred, a million dollars in funding, and most of the time it comes down to a couple of small tweaks on the file.

[Colin] came in around [fifty thousand], worked the roadmap, and picked up [an extra \$250,000].

Testimonial screenshot on screen.

Click below and finish it.

Brackets are for the real figures and the real testimonial. Film once per testimonial for extra retargeting variants.

Deliverable walkthroughs (next to write)

One screen-recorded walkthrough per document, 30 to 60 seconds, Chris talking over it. Demonstration format from the Goated Ads playbook: show the product on screen while explaining it. Same retargeting audience as Paul's statics.

1. Funding Snapshot, the two amounts and the gap
2. Credit Analysis Report, every item named
3. Credit Optimization Roadmap, the month strip
4. Bank and Lender Match List, the shortlist with score floors

With the six statics, that's ten retargeting creatives showing the actual product.

Retargeting statics for Paul

Six image ads for retargeting, one per deliverable plus the offer and the guarantee. Each image is a real screenshot of the actual document with the applicant's name blurred, so the viewer sees what they're buying. Same on-screen footer on all six: \$297 · Soft pull · Full refund if you're not happy.

#	Deliverable	What the image shows	Headline on the image
1	Credit Analysis Report	Section 05, negative items one by one, or section 03 with the utilization bars at the 10% line	Everything on your file holding you back, named.
2	Funding Snapshot	Section 01, the today versus after table with both amounts	What you qualify for right now. What you qualify for once your file is optimized.
3	Credit Optimization Roadmap	Section 01, the month strip	The order to do it in, month by month.
4	Bank and Lender Match List	Section 02, the lender shortlist with score floors	The banks that will approve you once your file is there.
5	The offer	The five documents fanned out, or the portal tile grid	\$297. One payment. Ten seconds after the form, it's all yours.
6	The guarantee	Plain text card, no document	If you're not happy with what you get, email us and we'll refund you.

The dispute letters are left out on purpose. The mini course isn't filmed yet and the community is a Facebook group, so neither carries an image.

House rules

These were set while writing the seven above. New ads follow them.

- Second person, straight at the viewer. Never "most business owners have no idea", always "you have no idea".

- Strongest register is I will, you will. "I'll pull your credit. I'll show you where your score sits. I'll hand you the list."
- Say the thing. No "the full read", no "read line by line", no riddles like "which one you're sitting on".
- Never say "the number" or "your number". Spell it out: how much you qualify for right now, how much once your file is optimized.
- Score now and score after. Skip the three-bureau score mechanics and the middle score explanation.
- "Sometimes it's one item, sometimes it's twelve" is how variable file condition gets said.
- Never make the viewer feel stupid. Blame the industry, never the owner. Never say they "got closed", say the call turned into a pitch.
- Never disqualify the clean-credit owner. He is the best ICP because he wants maximum funding and most files need work whether he knows it or not.
- The product is credit card stacking. Never frame it as a bank offer they take or leave. The file either gets worked or it doesn't.
- Future pacing stays broad: starts your new business, funds the one you're already running, gets you ahead of the guys you're competing with. Never "second location".
- "10x your file", "maximum fundability", and "maximum amount of funding" are approved language.
- Always "potentially seven figures", never a flat seven figures. "On a lot of files" rather than "typically".
- Proof in full sentences: I've been doing this for ten years, I've seen hundreds of files, tens of thousands of data points across the funding ecosystem, reverse engineered. Never the clipped version.
- Never name EIN, DUNS, net-30 vendors or gas cards.
- Never write "no guarantees". It reads as what's most likely and what we're aiming at.
- Guarantee wording: if you're not happy with what you get, email us and we'll refund you. The 15 day window is in the soft pull authorization, never in an ad.
- Close is one plain sentence about the soft inquiry. Never stacked fragments.
- Industry slams stay about the industry as a whole, never a named competitor.

- Andromeda: each ad is one reason to buy with its own hook, body and CTA. Hook swaps on shared body copy read as one creative and stopped working in July 2025.
 - Shoot style on everything: Chris seated, face to camera, in a location that looks expensive. Never selfie style, never phone-height handheld. Vary the location per ad, not the framing.

Open items

- Refund window is 15 days, decided. It lives in the soft pull authorization so they agree to it at checkout. The ads keep the open wording, "if you're not happy with what you get, email us and we'll refund you," and never state the number of days.
- Andromeda volume: seven ads is under the floor of 15 to 20 unique creatives a week. Each new one needs its own reason to buy.
- Reasons not yet written: a charge-off they think is permanent; personal data mismatch across bureaus; already paid somebody and got nothing; funding a second business; quoted six months and don't believe it; closer than they think; inquiries scaring them off applying.
- Format diversity: all seven are talking head. A screen recording walking through a real analysis report is a genuinely different creative and the documents already exist.
- The roadmap document still prints EIN, DUNS and net-30 in months five and six. Copy and deliverable disagree until that's edited. Month five should carry the complaint stage.
