

— FOUNDING CLIENT PROGRAM

The **\$10K** founding client program

An internal proposal for the Fundhub team: who we offer it to, what they get, why they'll say yes, and what it does for the company.

CLARITYPAY
FINANCING

Five founding clients get every Fundhub product in one \$10,000 package

We offer 4 to 5 hand-picked people from our inner circle a \$10,000 package that includes every Fundhub product and service, financed through ClarityPay over 24 months. Credit optimization and done-for-you funding are included with no deposit, and we still collect the funding success fee on the back end.

Capital

CLARITYPAY PAYS US UPFRONT

Feedback

FULL SYSTEM TESTED END TO
END

Proof

RESULTS AND TESTIMONIALS

- **Raises capital for Fundhub.** ClarityPay pays us upfront, and the client repays ClarityPay monthly.
- **Runs a focus group on the full system.** Five people go through every product end to end and give us structured feedback before we sell it publicly.
- **Produces proof.** Documented results and testimonials from real clients going through the full system, which we're currently short on.

Use of funds: ad spend and operating runway. Net cash of about \$35,100 to \$44,000 covers roughly 4 to 5 months of ad spend at \$300 a day, or a mix of ad spend and bills.

The full Fundhub stack

COMPONENT	WHAT IT IS	STANDARD PRICE
Funding Roadmap	Quad-bureau soft pull run through UnderwriteIQ: how much they qualify for, credit analysis, month-by-month optimization roadmap, nine dispute letters, bank and lender match list, business credit review, business duplication map	\$297
Capital Academy	The full self-paced education: every funding and credit strategy, the bank calling scripts, the bank-by-bank application order, and the full inquiry database. Being filmed now, live soon.	\$5,000
Capital Blueprint	The accountability system: an agent that breaks every step into small tasks, answers questions, and reaches them by text, email, and portal; steps that only clear when they're done; monthly soft pull with updated letters; paydown simulator; payment timing; ready-for-funding trigger; promo tracking after funding; a CSM making sure everything gets done; a credit partner file for a second applicant	\$5,000 to \$10,000

Done-for-you credit optimization	Our team runs the dispute rounds.	\$1,000 deposit WAIVED
Done-for-you funding	Our team runs the application rounds when the file is ready. Success fee still applies.	\$3,000 deposit WAIVED
Finance OS, 12 months	Connects all their accounts, tracks current and future cards, and recommends what to pay down to get ready for funding	Monthly fee FREE 12 MO
Priority access	First access to every feature we release in the future	Not sold separately

STANDARD VALUE \$14,300 to \$19,300 Before Finance OS, depending on how the Blueprint is priced	FOUNDING PRICE \$10,000 Financed over 24 months through ClarityPay
---	--

03 · THE PITCH

Why we're offering this, and why they'd say yes

The first thing a prospect will think is: why is Fundhub offering me a \$10,000 package, and what's in it for me? This section answers both.

WHAT WE TELL THEM

We built a complete system: underwriting, credit optimization, funding, education, accountability, and money management. Before we sell the full package to the public, we want 4 to 5 people we know and trust to go through every piece of it, tell us what works and what doesn't, and let us document their results. In exchange, they get everything we offer at a founding price, with the deposits waived, before anyone else.

Everything in that statement is true, and it gives them a clear reason the offer exists and why they were picked.

The trade

THEY GIVE US	THEY GET
\$10,000, financed over 24 months	\$14,300 to \$19,300 of products and services, plus Finance OS free for 12 months
Honest feedback on calls and forms	A system shaped around what they need, with direct access to Chris and the team
Permission to document results	Their file optimized and funded by our team, with deposits waived

The upside in their eyes

For someone with a 600 to 850 score, the biggest upside is the funding itself. Their roadmap will show how much they qualify for today and once their file is optimized. That amount is the main reason to say yes, so we show it to them before we ask for anything (see section 10).

Answering "what's the catch?"

- **The success fee still applies**, and they only pay it when we get them funded.
- **We ask for their time**: a weekly check-in, a monthly feedback call, and finishing their steps.
- **We're limiting it to 4 to 5 people** because we want to work closely with each one, and that only works with a small group.

Answering "\$10,000 is a lot for information"

- **They get a step-by-step plan built from their own file**, with every action in order and the context for why each one matters.
- **They go through it with oversight** from someone who has spent thousands of hours on credit files and funding, and our team does the work with them.
- **They get the full education on top**, so they understand what they're doing at each step.
- **Education plus experience is what makes them able to do it again** for every business they set up.

How they get persuaded

People say yes when they want the outcome, believe it will work for them specifically, see it happening fast with little effort on their part, and feel little risk. They also need a reason to act now. Every selling point below hits one of those, in the order the pitch should follow.

STEP 1 What they want

- \$100,000 to \$300,000 in 0% intro APR funding they can put into their business or investments, and the ability to do it again for every business they own.
- Compared with a loan at 20% APR, \$100,000 to \$300,000 at 0% for 12 months avoids up to about \$20,000 to \$60,000 in interest in the first year.
- Lead with their own roadmap: how much they qualify for today and how much once the file is optimized. That gap is the outcome in their own numbers.

STEP 2 Why they don't have it yet

- Their problem is follow-through. Courses and brokers tell people what to do, and people running businesses are busy, so they start, stall halfway, and never get the file ready.
- Every month the file sits unoptimized, the funding they qualify for stays lower than it could be. Every application made in the wrong order puts an inquiry on their report that stays for two years.

STEP 3 Why the Capital Blueprint gets it done

THE CORE SELLING POINT

The Blueprint exists so they finish. Every piece of it removes a reason people stall.

- **They always know the one next step.** The agent shows them exactly what to do, in what order, and how to do it.
- **Nothing feels overwhelming.** The agent breaks every task into smaller subtasks, and they can ask it questions anytime.
- **It reaches them where they are,** by text, email, and the portal, so steps don't get forgotten.
- **Steps only clear with proof,** like a mail receipt or a bureau response, so nothing gets skipped.
- **They see progress every 30 days.** A new soft pull updates their plan and rewrites the next letters based on what changed.
- **A real person makes sure it gets done.** The CSM tracks every client so nothing stalls on the way to funding.
- **They can bring someone with them.** A friend, business partner, or family member can be added as a second applicant at no extra cost.
- **They know what to pay and when.** The paydown simulator shows how to split their cash across cards, and payment timing tells them which day to pay each card before a round.
- **The moment the file is ready, we act.** The ready-for-funding trigger alerts the closer, and our team runs the application rounds.
- **After funding, nothing slips.** Promo tracking warns them before each 0% period ends so they're never surprised by interest.

STEP 4 Why they'll believe it works for them

- Everything is built from their own credit data, so the plan is about their file specifically.
- They see how much they qualify for before they pay anything beyond the roadmap.
- UnderwriteIQ comes from 10,000+ hours of analyzing credit reports and close to a decade in the industry, and experienced funding operators who've reviewed the deliverables say they haven't seen anything like it.

STEP 5 Why it's fast and takes little of their time

- Their roadmap is ready the same day.
- Our team does the credit optimization and the application rounds, so their part is a few steps a week.

We don't promise a timeline, because every file is different. We promise to get them funded as fast as their file allows.

STEP 6 Why the risk is low

- No deposits on credit optimization (\$1,000) or done-for-you funding (\$3,000).
- The success fee is only paid when they get funded.
- \$10,000 spread over 24 months, with the first 90 days covered if they hesitate.
- \$14,300 to \$19,300 of products and services for \$10,000, plus Finance OS free for 12 months.

STEP 7 Why now

THE MARKET RIGHT NOW

- **Borrowing is getting more expensive.** The Federal Reserve raised its benchmark rate on September 16, 2026, to 3.75% to 4.00%, its first increase since 2023.
- **Higher rates make 0% intro APR funding worth more,** because every other way to borrow costs more.
- **When the economy tightens, banks tighten approvals and cut credit limits,** as they did in 2008 and 2020. Optimizing their personal and business files and getting approved while banks are still lending protects their access to capital.
- **Capital secured now can go into cash-flowing assets:** their business, ad spend, and investments that produce income.

- Only 4 to 5 spots, offered personally to people we know.
- Founding clients get direct access to Chris and the team, shape the product, and get first access to every future feature for good. Later clients won't get that.

For people already in the funding industry

- They spend their time funding other people and rarely optimize their own file. This gets their own file and businesses funded for the maximum amount without them doing the work.
- UnderwriteIQ turns a soft pull into a full analysis, letters, and a lender list the same day, which takes them hours by hand.
- They can earn through the affiliate program: 20% on every sale they refer, plus 5% on sales from people their referrals bring in.

04 • PRICING AND FINANCING

\$10,000, financed through ClarityPay

Price	\$10,000
Financing	ClarityPay, 24-month term
Down payment	Whatever ClarityPay requires, if anything. Confirm with the rep.
Payments	The client pays ClarityPay every month starting right away
Success fee	10% of the funding they receive. On \$100,000 to \$300,000 in funding, that's \$10,000 to \$30,000.
Refunds	None on this package

Estimated payments by credit score

On \$10,000 financed over 24 months, before any down payment. These APR ranges are our estimates; ClarityPay sets the real APR from each client's credit and state, anywhere from 0% to 36%.

CREDIT SCORE	ESTIMATED APR	MONTHLY PAYMENT	FIRST 90 DAYS
750 and up	0% to 12%	\$417 to \$471	\$1,250 to \$1,412
700 to 749	10% to 20%	\$461 to \$509	\$1,384 to \$1,527
650 to 699	18% to 29%	\$499 to \$554	\$1,498 to \$1,662
600 to 649	25% to 36%	\$534 to \$590	\$1,601 to \$1,771

05 · THE 90-DAY PAYMENT COVER

Results before their first monthly payment

Default: the client pays every month from the start. If a candidate is hesitant, we offer to cover their first 90 days of payments. They still pay any down payment ClarityPay requires. This gives them three months to see results and test the system before any monthly payment comes out of their pocket.

Ask the ClarityPay rep to set this up as a 90-day deferred first payment funded by us, so the cost comes out of our payout. A deferred first payment isn't one of ClarityPay's published plan types (BNPL, true 0% APR, fixed APR, and no-interest promos), so confirm it's available before pitching it.

Worst-case cost if all 5 clients take the cover at 36% APR: about \$8,900. Clients with higher scores cost us less.

06 · WHAT FUNDHUB GETS

The numbers for five clients

\$10,000 financed, 12% ClarityPay merchant fee. Any down payment ClarityPay requires doesn't change our total.

LINE	PER CLIENT	5 CLIENTS
Package price, financed through ClarityPay	\$10,000	\$50,000
ClarityPay merchant fee (12%)	-\$1,200	-\$6,000
Cash to Fundhub upfront	\$8,800	\$44,000
90-day cover, worst case (only if offered)	-\$1,771	-\$8,857
Net cash, worst case	\$7,029	\$35,143

UPFRONT CASH, 5 CLIENTS

\$35,100 to \$44,000

SUCCESS FEES, 5 CLIENTS

\$50,000 to \$150,000

On top of the upfront cash:

- **Funding success fees.** The average client gets \$100,000 to \$300,000 in funding. At 10%, that's \$10,000 to \$30,000 per client and \$50,000 to \$150,000 across five.
- **Future funding sequences.** Funded clients can run another funding sequence once their file recovers, which brings another success fee.
- **Finance OS revenue after month 12,** when they move to the monthly member fee.
- **Case studies and testimonials** for the \$297 roadmap, the Blueprint, and Capital Academy.
- **Structured feedback** on every product before public launch.

07 · PROTECTING THE PAPER

Keeping clients paying and our ClarityPay standing clean

WHAT HAPPENS	WHO CARRIES IT
A client stops paying	ClarityPay collects from them, and their credit takes the hit. We keep our payout, assuming our agreement is non-recourse (confirm with the rep).
A client disputes the sale	Usually "I didn't get what I paid for." The money can be pulled back out of our account.
A pattern of defaults or disputes	ClarityPay can hold back part of each payout (up to about 5% is common), slow payouts, raise our fees, approve fewer of our customers, or drop us.

THE SMALL-COHORT MATH

With 5 clients, one default is a 20% default rate. Lenders watch for rates around 2% to 3%, so in this cohort every client matters.

What gets a merchant flagged

- **Missed first payments.** Lenders read a client who never makes a single payment as a sign of fraud or a sale made to someone who couldn't afford it.
- **Disputes.** ClarityPay requires merchants on Whop to keep disputes under 2%, and card networks penalize merchants over 0.9%.
- **Overall defaults.** Other lenders we've looked at want merchants at or under 3%. Buy now pay later losses average about 2%.
- **Our category.** High-ticket programs delivered over time already start in the riskier group.

How we keep clients paying

- 01 **Only enroll people who can afford it.** Show the monthly payment before they apply and confirm it fits their budget.
- 02 **Autopay at enrollment,** with the payment date right after their paycheck.
- 03 **Visible results in the first two weeks:** roadmap the same day, first letters out in week 2.

- 04 **Start dates in the agreement** for anything not live yet, like Capital Academy and Finance OS.
- 05 **A complete paper trail:** signed agreement, deliverable timestamps, portal logins, and check-in records.
- 06 **Catch missed payments early.** If the merchant portal shows a missed payment, the CSM reaches out the same day.

Questions for the ClarityPay rep

- Are we liable if a customer stops paying?
- How long after the sale can a dispute pull money back from us?
- Do you hold back part of each payout, and how much?
- How fast do payouts reach our account?
- Is there a down payment requirement?
- Can clients set up autopay and choose their payment date?
- Does our merchant portal show when a client misses a payment?

08 • WHAT WE ASK FROM PARTICIPANTS

What the cohort agrees to

Because this is a focus group, the client agrees to:

- Complete the steps in their roadmap and Blueprint on time.
- A weekly check-in with the CSM.
- A monthly feedback call (about 30 minutes) on what's working and what isn't.
- A short feedback form after each Capital Academy module and each major product milestone.
- Permission to document their results as a case study (with their name or anonymized, their choice).
- An on-camera interview at day 90 walking through their whole experience and results.
- Input on the welcome kit, which we'll design with the cohort.

09 • WHO TO PICK

The right four to five people

- People from our inner circle whom we trust to give honest feedback and finish the steps.
- Willing to go on camera and walk through their whole experience.
- Credit from 600 to 850 FICO.
- A mix of files so we test the whole system: some in the 600s who go through credit optimization first, and some higher scores who go to funding sooner.
- Mix of business owners and people who want personal funding, if possible.

Before the first pitch

- 01 **ClarityPay confirmed:** the 24-month plan, whether a 90-day deferred first payment or a 0% APR plan is available and what it costs us, and the rep questions in section 07.
- 02 **Start dates set** for each component the cohort gets: Capital Academy access, Capital Blueprint and the accountability agent, and Finance OS.
- 03 **Shortlist of 6 to 8 names,** ranked, so we can enroll 4 to 5.
- 04 **Client-facing offer sheet,** a one-page summary of what they get, the price, and the monthly payment. This internal document is never sent.
- 05 **Enrollment agreement** covering the package, the success fee, the no-refund terms, and the focus-group commitments.

How to close each person

- 01 **Personal invite from Chris.** A direct call or text explaining that we're opening 4 to 5 founding spots to people we know.
- 02 **Run their roadmap first, free.** Do the soft pull and show them how much they qualify for today and once their file is optimized. That amount is the strongest selling point we have, and it shows the value before we ask for anything.
- 03 **Walk through the package** using the selling points in section 03, tied to what their roadmap showed.
- 04 **Show the monthly payment** and offer the 90-day cover if they hesitate.
- 05 **Enroll on the call:** ClarityPay application and signed agreement.
- 06 **Onboard the same week** so they see progress right away.

From shortlist to day 90

WHEN	WHAT HAPPENS	OWNER
Week 1	Confirm ClarityPay's down payment requirement, the 90-day deferred payment option, and the cost of a 0% APR plan. Draft the shortlist of 6 to 8 names.	Chris, sales manager
Week 1 to 2	Pitch the shortlist one-on-one. Enroll 4 to 5. Run ClarityPay approvals.	Chris, sales manager
Week 2	Run quad-bureau soft pulls, deliver roadmaps, set up Finance OS, Blueprint, and Capital Academy access.	CSM
Week 2 onward	First dispute rounds go out. Weekly CSM check-ins begin. Feedback log starts.	Credit optimization specialist, CSM

Monthly	Feedback calls, monthly soft pulls, updated letters, product fixes from feedback.	CSM, Chris
File ready	Ready-for-funding trigger alerts the closer, and the funding advisor runs the application rounds.	Closer, funding advisor
Day 90	Review: results per client, feedback themes, testimonials, and a decision on the public price and launch.	Whole team
